DETAILED ACTION

This action is responsive to the after final amendment filed March 22, 2004. As directed by the amendment, claims 27 and 28 have been cancelled. Claims 1, 4, 5, 8-15, 18, 20, 26 are pending.

Allowable Subject Matter

1. Claims 1, 4, 5, 8-15, 18, 20, and 26 are allowed. The following is an examiner's statement of reasons for allowance: Engel (U.S. 5,244,446) teaches a device including a first arm having a first and second end, and a second arm having a first and second end, the first arm attached to a joint assembly, and the second arm being pivotally connected to the joint assembly. Haaheim (U.S. 4,618,139) teaches the use of a clutch member in a rotational resistance device. Ferber teaches details of rotational resistance device structure including an engaging cup member and cone member for acting together to provide resistance. Bernstein (U.S. 5,037,088) teaches a device with a first and second arm connected to a rotational joint assembly. The prior art of record fails to teach the above limitations, and further teaching a spring loaded detent being mounted on the cup member to urge against the knob and provide an aural signal in response to the rotation of the knob, nor does it teach a cup member with an annular groove centered on an axis of rotation and lying in a plane substantially perpendicular thereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fenn C Mathew whose telephone number is (703) 305-2846. The examiner can normally be reached on Monday - Friday 9:00am - 5:30pm.
